2026 TECHNOLOGY PROJECTS

District-Wide Public Address and Classroom Sound System Upgrades

L'Anse Creuse Public Schools is requesting bid proposals to procure, replace, and configure a new public address system and sound reinforcement solution within their buildings and classrooms throughout the District. The new public address system will interact with the classroom sound reinforcement systems.

- Clearer teacher voice projection for improved student engagement and learning
- Instant classroom-to-office emergency communication for enhanced safety
- Modern, reliable PA system supporting district-wide communication needs
- Technology upgrades that strengthen both instructional quality and school security

Project Schedule: **February** 2026-December 2026

District-Wide Security Camera Upgrades

L'Anse Creuse Public Schools is requesting a bid proposal to replace and configure a new security camera system within their buildings in the District.

- Transition from legacy analog system to advanced IP-based security platform
- Deployment of 500+ new high-definition cameras across all district facilities
- Enhanced software capabilities for monitoring, storage, and analytics
- Improved coverage, reliability, and situational awareness for campus safety

Project Schedule: May 2026-August 2026

District-Wide Interior Fiber & Network Switch Replacement

L'Anse Creuse Public schools is requesting a bid proposal to replace the existing interior fiber cabling between the IT closets and upgrade their existing network switches within the buildings.

- Replacement of aging interior fiber cabling with new, future-ready infrastructure
- Upgrade to single-mode fiber for faster speeds, greater bandwidth, and long-term scalability
- Improved network reliability and performance across all district facilities
- Foundation to support emerging technologies and future growth

Project Schedule: June 2026-November 2026
